***Response to Amendment***

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.
2. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO 97/32005 is withdrawn in view of applicant's arguments.

***Claim Objections***

3. Claim 11 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. The aforementioned claim appears to not further limit the parent claim because said claim requires at least 20wt% of a total anionic surfactant. However the parent claim 1 requires that the total anionic surfactant content be "at least 95%". Clarification and/or corrections are required.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 1751

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

7. Claims 1-11 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over GB (2,142,341).

GB '341 discloses a synthetic surfactant flake containing sodium alkyl sulfate, sodium alkyl benzene sulfonate and sodium chloride (abstract).

GB '341 specifically discloses that said surfactant flake comprises C9-C15 alkyl sulfate and alkyl benzene sulfonate at a level from 90 to 99.5% and in a ratio of from 1:1.5 to 1.5:1 (page 2, lines 24-33). With respect to sodium chloride the processing aid or builder, GB '341 teaches that said aid is present in an amount from 0.5 to 10%. GB '341 further teach or suggest said flakes are prepared by mixing the surfactants, sodium chloride and water and incorporating sodium carbonate to produce a detergent flake (page 2, lines 50-60).

As this reference teaches all of the instantly required it is considered anticipatory.

In the alternative, if GB '341 does not specifically teach each of the claimed limitations of the instant claims, it would have been with the purview of the skilled artisan to combine the components of GB '341 to produce the anionic flake particle because GB '341 teaches and suggest each of the claimed limitation for the purpose of purpose of produce an anionic particle and absent a showing to the contrary.

### ***Double Patenting***

8. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

9. Claims 1-11 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-21 of copending Application No. 10/726,739. Although the conflicting claims are not identical, they are not patentably distinct from each other because they overlap in subject matter pertaining to particles having alkyl benzene sulfonates, alkyl sulfates and processes.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
